Summary

Hi..! I'm Forhad Mia,

Passionate and detail-oriented Frontend Developer equipped with a solid foundation in HTML, CSS, and JavaScript, complemented by proficiency in modern frameworks like React and design utilities such as Tailwind CSS. Recently completed an intensive web development course, cultivating a keen eye for user-centric design and intuitive user experiences.

PROJECTS

Fitness First

[View in GitHub](#)

- Implemented a MongoDB database to efficiently manage user profiles, fitness plans, and progress tracking, ensuring a personalized experience for every user.
- Implemented secure authentication and authorization mechanisms using Node.js and Express.js, safeguarding user data and ensuring privacy compliance.
- Utilized Express.js to create a robust API for real-time workout session scheduling and seamless communication between trainers and clients.

Job Spotnet

[View in GitHub](#)

- Allow users to create accounts, log in, and manage their profiles. Firebase Authentication might be used for this.
- Enable users to search for jobs based on criteria like location, job title, company, or category.
